

ACTUAL SITUATION OF THE NATIONAL DEFENSE AND SECURITY TRAINING RESULTS AT THE CENTER OF DEFENSE AND SECURITY EDUCATION, BAC NINH SPORTS UNIVERSITY

Nguyen Van Hoa⁽¹⁾
Tran Thi Thu Hang⁽²⁾

Abstract:

Using regular scientific research methods, the topic has assessed the actual situation of the national defense and security training results at the Center of Defense and Security Education, Bac Ninh Sports University. This is the basis for helping the managers, professionals, faculty members obtain the necessary information in order to propose appropriate solutions to practical teaching and training at the Center, contributing to enhancing the quality of the national defense and security training work at the Center of Defense and Security Education, Bac Ninh Sports University.

Keywords: Training, national defense and security, Bac Ninh Sports University.

INTRODUCTION

The Center of National Defense and Security Education of Bac Ninh Sports University was established under Decision No. 161 / QD-TTg dated January 30, 2015 of the Prime Minister. On that basis, on 02 / 7 / 2015 The Minister of Culture, Sports and Tourism issued Decision No. 2295 / QD-BVHTTDL regulating the functions and tasks of the Center of Defense and Security Education of Bac Ninh Sports University. Right from its first founding days, based on the functions, duties and powers of the Center, the Board of Directors has focused on researching and establishing internal documentation systems to stabilize the organization and put Center into operation to ensure quality requirements. The Center of Defense and Security Education, Bac Ninh Sports University include two main functions: Training National Defense and Security curriculum for pupils and students; Organize fostering knowledge of national defense and security for subjects in accordance with the law.

From the founding to the present, the cooperating work of the center has partnered with many units and successfully held 18

courses, received nearly 20.000 students from colleges and universities. However, the Center has not yet conducted the overall evaluation of the training organization process. Therefore, the assessment of the actual situation of the national defense and security training results at the Center of Defense and Security Education, Bac Ninh Sports University is identified as an urgent issue, thereby creating a scientific basis for proposing solutions to improve training effectiveness.

RESEARCH METHODS

The research process uses the following methods: Methods of analyzing and synthesizing documents; Method of interviewing seminars; Method of pedagogical observation; Method of pedagogical examination ; Statistical mathematical methods.

RESULTS AND DISCUSSION

1. Actual situation of the number of units bringing students to the Center of National Defense and Security Education, Bac Ninh Sports University

Carrying out Joint Circular no.: 123 /2015 / TTLT MOD-BGDĐT-BLDTBXH November 11th, 2015 until now the Center of National

(1) PhD, Bac Ninh Sports University

(2) Master, People's Police Academy

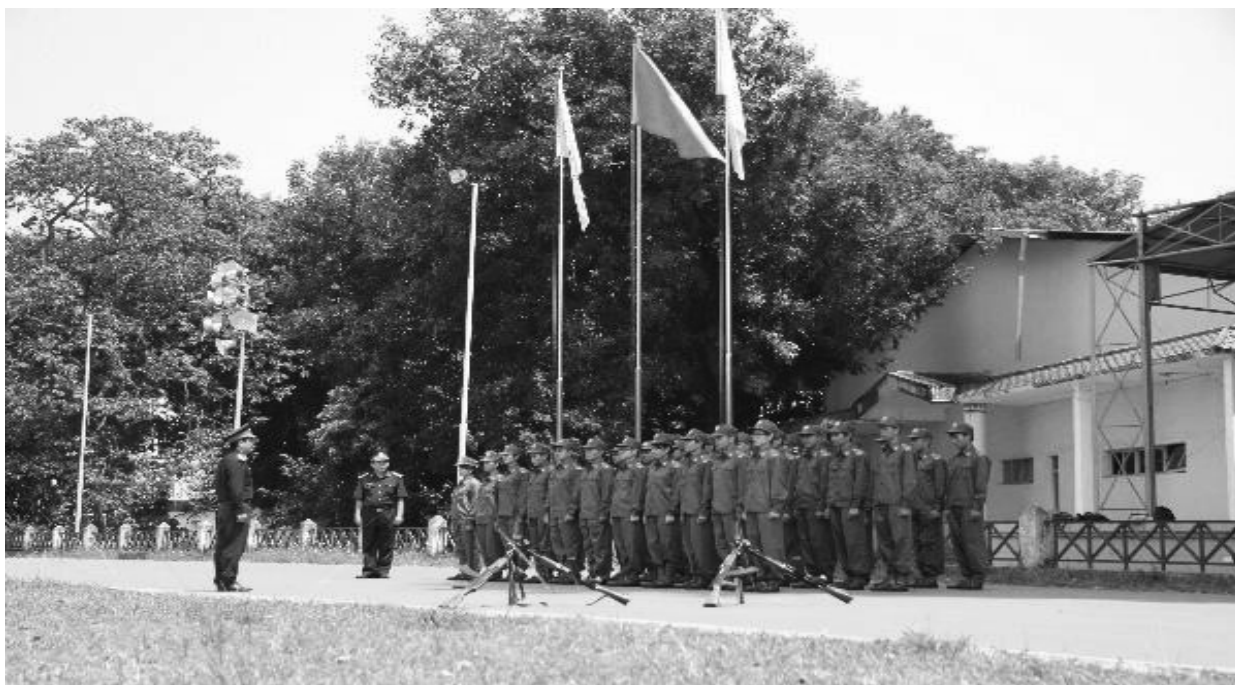

Defense and Security Education has been undertaking National Defense and Security training organization for 17 associate units, including 02 training subjects: Firstly, for students of the Vocational Training colleges, who are divided into the implementation of the training program of the Ministry of Labor, War Invalids and Social Welfare, completing 75 (periods) program at the level of academic transcript certified including: 11 associating schools; Secondly, for students of universities and colleges who are divided into the implementation of the program of the Ministry of Education and Training to complete the 165 (periods) program at the level of subject certified, including: 06 associating schools. The plan for organizing the training and distribution of associate schedules is worked by the Students Training and Management Department closely with the Training Department of associating colleges and universities.

The number of universities and colleges belonging to the associating partition under Joint Circular No. 123123/2015 / TTLT-BQP-BGDĐT-BLĐT BXH is 17 units on training the national defense and security subject at the Center, of which there are 13 universities and colleges that have sent students to training, while 04 colleges have not brought students to the training center; There are 02 units (Dong A University of Technology, Bac Ninh Medical College) in the province that are not in the associating list. However, for the benefit of the students and the brand of the University, the above units have actively brought students to the training at the Center. According to the statistics, among the units assigned to the Training Center are Colleges (accounting for 13 colleges), Universities (06 universities); Although the number of associating units assigned to the Center is very large, the number of actual trainees at the Center is not high. Because most colleges cannot enroll students, it has a great influence on the overall training plan development. The results of statistics on the number of students studying in the Center for 03 years (in 2017, there were 8825 students, in 2018, 6415 students and in 2019 were 4596 students), the above results show

the real number of students. The number of students studying at the center is declining. Due to the unequal number of students enrolling in the associated schools, the distribution of class schedules at the Center is also affected, there are many months when students study, there are months when the number of students coming back is very few, therefore it greatly affects the quality of training at the Center. From the objective reality above, the Center should have appropriate solutions to practical conditions in order to improve the quality of training national defense and security education program at the Center.

2. The actual situation of the learning results of the national defense and security subject from 2017 to the present at the Center of Defense and Security Education, Bac Ninh Sports University

The work of thoroughly understanding the documents of the higher-level agencies of the Center has well collaborated with the schools in the implementation of the Law on National Defense and Security Education prescribed in Article 12, Chapter II - Law No. 30/2013 / QH13 on Educating pupils and students, as well as complying with Joint Circular No. 18/2015 / TTLT-BQP-BGDĐT-BLĐT BXH regulating the organization of teaching and learning. In recent years, the Center has done well in organizing the reception, student management, handing over of students when coming to study and finish the course strictly and methodically, in accordance with the coordinating process of exchanging information, checking and evaluating students' quality results have always received the trust from the associating units; From 2017 to present, the center's training cooperation has cooperated with 15 units and successfully organized 18 courses, receiving 19,836 students from colleges and universities including many subjects of different departments. However, there are 04 universities that have not yet organized the association as prescribed (Vietnam Dance College; Vocational Training College of Management and Technology; Vietnam Tourism College; Viet Nhat College of Languages and Technology).

The center always strictly abides by the training regulations, organizes examinations, tests and quality assessments in an objective, honest manner and considers the conditions for issuing certificates strictly according to the regulations of the Ministry of Education and Training. Overall assessment of training results at the Center always accounts for a high percentage in the past school year, ensuring absolute safety of people in learning and training activities for students, organizing training., strictly maintaining military discipline, building up regular and orderly units. Results of national defense and security education training from 2017 to the present at the Center of Defense and Security Education, Bac Ninh Sports University are presented in Table 1.

The results in Table 1 show:

- In 2017, there were 10 associating schools bringing students to training at the Center, the number of students was 8,825, there were 126 failed students accounting for 1.43%, the number of good students was 972, accounting for 11.02%, the percentage of students achieving fair grades is 4,904, accounting for 55.54%, the percentage of students achieving

average grades is 2,822 accounting for 31.98%;

- In 2018, there were also 10 associating schools that took students to the training at the Center, the number of students was 6,415, the percentage of students achieving good grades was 454, accounting for 7.07%, the percentage of students achieving fair grades was 3,300 accounting for 51.44%, the percentage of students achieving average level is 2,591, accounting for 40.39%, there are 70 students who failed, accounting for 1.09%;

- Up to August 31, 2019, there were 7 associating units taking students to the training at the Center, the number of students was 4596, the rate of students achieving good grades was 316, accounting for 6.42%, the percentage of students achieved fair grades is 2415, accounting for 51.77%, the percentage of students reaching the average level was 1837 accounting for 41.19%, with 28 failed students accounting for 0.62%.

Thus, the training results for students of associating schools in the past 3 years are relatively even, showing that the number of good, fair and average students is equal. However, the total number of students studying at the Center has decreased significantly over

the years, due to the difficulty of enrollment of associating units.

CONCLUSION

From 2017 to August 31, 2019 the Center of Defense and Security Education, Bac Ninh Sports University has trained 19,836 students, of which the number of students of Good - Fair level accounted for 58.19% to 66.58%, students achieved average level accounts for 31.98% to 41.19%, the number of students who failed accounts for a very low rate from 0.62% to 1.43%. The majority of associating units are vocational training colleges which are implemented under the training program of the Ministry of Labor, War Invalids and Social Welfare, so the time for trainees to train at the center is 02 weeks, allocated training plans from June to February every year, but the number of students is not high. The main reason here is the students enrollment does not meet the criteria. Among the universities that send students to study at the Center, there is the University of Economics – Technology for Industries with a large number of students from 50.14% to 65.01%, who are mainly trained from March to May every year, this is also the peak training time for the Center. The current situation of this training result will be the basis for the Center Board of Directors, managers, lecturers to have grounds to propose solutions suitable with the

actual conditions of the University's facilities in order to further improve the quality of national defense and security education for students.
